

AYUSH KUMAR JENA

Web Developer

☎ +918848xxxxxx ✉ jenaayush72@gmail.com [in linkedin.com/in/ayush-jena](https://www.linkedin.com/in/ayush-jena)

Summary

A passionate web developer who enjoys building modern, responsive, and user-friendly web applications. I have experience working with front-end and web technologies to create clean and efficient interfaces.

Skills

Programming & Querying: SQL, Python

Data Visualization Tools: Advanced MS Excel, Power BI, Tableau

Analytical Abilities: Data Cleaning, Exploratory Data Analysis (EDA), Insight Generation, Descriptive Statistics

Experience

IOT Engineer Intern

November 2024 – January 2025

Dataview Analytics (Remote)

Tools Used: Raspberry PI, Arduino Uno, Power BI

- Developed and tested IoT-based data collection systems using Raspberry Pi and Arduino Uno for real-time monitoring.
- Integrated sensors and microcontrollers to collect environmental and device data, enabling automated data logging and analysis.
- Built data pipelines to transmit sensor data to cloud or local databases for monitoring and visualization.
- Created Power BI dashboards to visualize IoT device data, helping teams monitor performance trends and system metrics.
- Collaborated with the development team to debug hardware-software communication issues and improve system reliability.

Projects

AI-Based Threat Detection System (Defense AI Project) | Python

March 2025 – April 2025

AI-Based Threat Detection System

React.js, Node.js, Python, OpenCV

- * Developed an AI-powered web application to detect suspicious human activities using computer vision.
- * Integrated machine learning models to classify individuals as civilians or potential threats in surveillance footage.
- * Built a responsive React.js dashboard to visualize detection results and real-time monitoring.
- * Integrated LLM capabilities to generate automated threat analysis reports.

IoT Smart Monitoring System | SQL, Power BI

February 2025 – March 2025

IoT Smart Monitoring System

Raspberry Pi, Arduino, Python

- Developed an IoT-based monitoring system to collect and analyze sensor data in real time.
- Integrated sensors with Raspberry Pi and Arduino to track environmental and device metrics.
- Built a data pipeline to store sensor readings and generate insights using Power BI dashboards.
- Improved monitoring efficiency by enabling automated alerts and visualization of device performance.

Awards & Certifications

- **Google Associate Cloud Certificate – Coursera (2024):** Completed 8 practical case studies involving SQL, data cleaning, dashboards, and presentations.
- **Top 5% in SQL Hackerrank Challenge – 2024:** Ranked among top 150 out of more than 3,000 participants for advanced SQL problem-solving.
- **Best Final Year Project – 2025, Government Polytechnic College:** Built a Line Following Robot prototype model analyzing ir sensors across 6 and detecting the marks by own.

Education

Government Polytechnic College

Odisha, India

Diploma in Computer Science and Engineering — CGPA :7.5

2022 – 2025

REVA University Bengaluru

Karnataka, India

Bachelor of Technology (B.Tech) in Computer Science and Engineering

2025 – 2028
